

Growth comparison between patients with rapidly progressing MPS VI and unaffected age-adjusted peers^{1,a}

Growth comparison between patients with slowly progressing MPS VI and unaffected age-adjusted peers^{1,b}

Adapted From Quartel, *JIMD Rep*, 2015.

Abbreviations: MPS VI, mucopolysaccharidosis VI; uGAG, urinary glycosaminoglycans.

^a For the purpose of this data set, patients with uGAG levels of >200 µg/mg creatinine are considered to have rapidly progressing MPS VI.

^b For the purpose of this data set, patients with uGAG levels of 200 µg/mg creatinine are considered to have rapidly progressing MPS VI.
